## Develop your artistic point of view.

Tap your potential as a painter, sculptor, or printmaker. Define your vision.  
Share your talent with the world.

Gain the creative and technical skills to become a professional artist. The School of Fine Art offers specialization in painting, drawing, and sculpture as well as several courses in printmaking. Courses are taught by a faculty of established practicing professionals and consist of lectures, rigorous studio work, critiques, field trips, and guest artists. Whether your interest is portraiture, figure, landscape, cityscape, animal, expressionism, or abstraction, the School of Fine Art provides excellent training.

In addition to helping you develop and master your craft, we'll teach you skills that will help you be successful in the art world. You will learn what it takes to be an artist-entrepreneur. For example, our BFA Senior Portfolio/Professional Practices and MFA Professional Practices courses teach the disciplines necessary to own a Fine Art business, including website creation, copyright law, taxes, and how to promote yourself and your work as an artist-entrepreneur.

## Portfolio

Build a portfolio that has collectors and galleries clamoring for your work. You will learn how to find gallery representation and identify venues to exhibit and sell your art.

*Defy the Ordinary, Create the Extraordinary*

## A Professional Process

We start with the fundamentals, focusing on the skills needed to compose, design, draw, paint, and sculpt. As your abilities improve, you will develop your artistic point of view as you learn about the artistic and professional aspects of fine art.

## Get Connected

We are committed to creating networking opportunities for you within the larger art and design worlds, including inviting gallerists and curators to open studios to give you an opportunity to make connections.

## Painting

In the Painting track, you will learn in depth about composition and color, style, and technique, all in order to understand and achieve beauty as a still-life, watercolor, portrait, landscape, abstract, or figure painter.

## Sculpture

In the Sculpture program, you will learn traditional skills for figure- and non-figurative work, as well as new technology skills that can be applied to the forms that express your personal artistic vision.

## Printmaking

Various printmaking courses are offered such as etching, silkscreen, monotype, book arts, lithography, and relief printing.
